DRAFT VERSION

0. INTRODUCTION

The instructions are valid for the "UN/EDIFACT UNITED NATIONS STANDARD MESSAGE (UNSM) DRAFT STOWAGE INSTRUCTION MESSAGE" (mnemonic MOVINS), as designed by the SMDG (User Group for Shipping Lines and Container Terminals).

The instructions in this manual are valid for transport of containers by **RAIL**.

This manual is intended for use by terminal operators, rail operators, etc.

This "User Manual" (or "Implementation Guide") version 0.1 was developed in 2008 and 2009 by the **User Group for Shipping Lines and Container Terminals SMDG**.

The **SMDG** is a "Pan European User Group" under the auspices of the **Western European Edifact Board (WEEB)**.

SMDG claims full copyright to this manual and its contents, however, the manual may be copied and used by anyone, without the consent of the SMDG.

It is not allowed to change the contents of this manual!

DRAFT VERSION

1. ADDRESSES

Any remarks, comments or questions can be addressed to the following address:

SMDG Secretariat
Kamerlingh Onnesweg 10c
2991 XL Barendrecht
The Netherlands
Phone: 31-10-2941100
Fax: 31-10-2941105

or to any active member of the SMDG.

DRAFT VERSION

2. GENERAL

The EDIFACT Stowage instruction "MOVINS" will be used to transmit the train composition information about Rail loading activities on a specified train from the operator or owner of the train to any party involved with the operation on this train at a certain place.

The Principle

The handling instructions given in the "MOVINS" message will apply to the information available in the planning system of the terminal. The details of the train, like train id, wagon numbers and container position numbers on the wagon, should be known by the planning system of the terminal.

This message is to be transmitted in general from the operator/owner of a MoT or a stowage centre to e.g. the Rail-terminal operator in the receiving terminal. Generally, information transmitted in a "MOVINS" message applies to the data previously received in a "BAPLIE" message. The results of the operation optionally will be reflected in a new BAPLIE message.

The receiver of this message is able and may extract information from the message and incorporate respectively build up a new Bayplan message "BAPLIE" as the message structure of "MOVINS" is based on the "BAPLIE" message. The sequence of related segments such as DTM, RFF, NAD followed by segments TDT/LOC/DTM of group 1, is the same as in the "BAPLIE" message.

Conventions

In this document a data element will be identified by the lowercase letter "e" followed by its element number (example: e8053). A data element within a composite will be identified by the lowercase letter "c" followed by the composite number followed by a full stop "." followed by the lowercase letter "e" followed by the element number (example: c237.e8260).

Immediately below the segment tags and data element identification the usage of same will be mentioned as follows:

'M' = mandatory:	The segment or data element is mandatory and must be given.
'R' = required:	The segment or data element is conditional but MUST be used anyway.
'D' = dependent:	The segment or data element is conditional and its use depends on some condition. This condition must be clarified in the description.
'A' = recommended:	The segment or data element is conditional and its use is recommended.
'O' = optional:	The segment or data element is conditional and its use is optional at the discretion of the sender.
'X' = not used:	The segment must not be used.

Next to the usage indicator the official format of the field will be given, i.e. a4 or an..15. The description may further limit the format of the field, f.e. a field with a format an..17 may be limited to an12 by its description.

If composites or data-elements are repeated within a segment, respectively a composite, the occurrences of the composites or data-elements can be indicated by its sequence number within the segment or composite between brackets, e.g. "(1)" being the first occurrence of the composite or data-element within the segment. If its occurrence within the segment or composite is of no relevance then the sequence number will not be mentioned. If the sequence numbers are mentioned, but not all of them (e.g. only 2 out of 5 occurrences are described), then the remaining occurrences may NOT be used, unless agreed otherwise between partners.

Data elements within the segments that are not mentioned here will not be used,

DRAFT VERSION

resp. should not contain important information, since they will probably not be seen by the recipient, unless agreed otherwise.

SMDG recommends to use only data elements, qualifiers and codes described in this manual. If partners agree to use additional data elements, qualifiers and codes, not described in this manual, then specific and detailed agreement about those data elements, qualifiers and codes should be made!

Optional data elements may be omitted, unless specifically made compulsory by this manual (Indicator "R" = required), or unless agreed otherwise between partners.

In no case neither mandatory segments according to the Stowage Message Documentation "MOVINS" nor mandatory composites or data elements according to the relevant Segment Directory may be omitted.

DRAFT VERSION

3. VERSIONS

Data elements, composites and segments of the **UN/Edifact draft directory D.95B** are used in this manual.

Codes and qualifiers used, are according to **UN/EDIFACT Directory D.95B Code List**.

In some occasions, however, the required code or qualifier could not be found in the code list. In such cases a temporary code was assigned, awaiting the final code allocation from the UN/Edifact Board Code commission.

Also in some cases small amendments to the message structure were necessary. This manual anticipates on the approval of the respective CR (Change Request) or DMR (Data Maintenance Request) by the UN/Edifact Board. The structure of the message, as given in chapter 7, was agreed as such by the members of SMDG and will be implemented accordingly.

The Movins implementation guideline for container vessels, version 2.0.4, has been used as a template for this guideline for rail.

DRAFT VERSION

4. DESCRIPTION**UNB (M1) INTERCHANGE HEADER**

+

s001.e0001 Syntax Identifier: Always "UNOA", indicating the use
(M a4) of level "A" character set.

:

s001.e0002 Syntax Version Number: Always "1".
(M a1)

+

s002.e0004 Sender Identification: Name code of the sender of the
(M an..35) interchange (message). To be agreed between partners.

+

s003.e0010 Recipient Identification: Name code of the recipient of
(M an..35) the interchange (message). To be agreed between partners.

+

s004.e0017 Date of preparation: Preparation date of the interchange
(M n6) (message).

:

s004.e0019 Time of preparation: Preparation time of the interchange
(M n4) (message).

+

e0020 Interchange control reference: A reference allocated by
(M an..14) the sender, uniquely identifying an interchange. This reference must
also be transmitted in the Interchange Trailer segment UNZ.

+

+

+

+

+

e0032 Communications Agreement Id: A code identifying the
(A an..35) shipping line of the vessel (BIC, SCAC or mutually agreed).
N.B. This code enables proper routing of the message by the recipient.

,

DRAFT VERSION

UNH (M1) MESSAGE HEADER

+

e0062 Message reference number: A reference allocated by the sender,
(M an..14) uniquely identifying a message. This reference must also be transmitted
in the Message Trailer segment UNT.

+

s009.e0065 Message Type Identifier: The name of the UNSM or standard
(M an..6) EDIFACT message. In this case always "MOVINS".

:

s009.e0052 Message Type Version Number: The version number of the message.
(M an..3) See EDIFACT documentation. At this moment the version is "D".

:

s009.e0054 Message Type Release Number: The release number of the message.
(M an..3) See EDIFACT documentation. At this moment the release number is
"95B".

:

s009.e0051 Controlling Agency: The code of the controlling agency. For
(M an..2) this message the controlling agency is "UN".

:

s009.e0057 Association Assigned Code: The applicable SMDG User Manual version
(R an..6) number. For this manual always: "SMDG20". This will enable the recipient
of the message to translate the message correctly, even if older
versions are still in use.

,

DRAFT VERSION

BGM (M1) BEGINNING OF MESSAGE

+

c002.e1001 Document/Message Name, coded. Code indicating which type of MOVINS this concerns.
Allowed code: 650 = Handling order (Rail Transport).

Note:

A similar code will be added to the User Guide for MOVINS for container vessels in order to align this data element with each other.

Important warning:

If this data element remains empty the recipient of the message may erroneously decide that the message is a MOVINS for container vessels and not for rail!

+

e1004 Document/Message Number: Reference allocated by the sender individually, taken from the application.
(R an..35)

+

e1225 Message Function, Coded: Code indicating the function of the message. Acceptable codes are:
(R an..3)
"2" = Add. Add to previous message.
"3" = Delete. Delete from previous message.
"4" = Change. Message with changes on previous message.
"5" = Replace. Message replacing a previous one.
"9" = Original. First or basic message.
"22" = Final. The final message in a series of MOVINS messages.

,

Remarks: In principle only original messages (code "9") are allowed. The other codes may be used after prior agreement between sender and recipient.

DRAFT VERSION

DTM (M1) DATE/TIME/PERIOD

+

c507.e2005 Date/Time/Period Qualifier: Code "137" (Document/Message
(M an..3) date/Time)

:

c507.e2380 Date/Time/Period: Date or date/time of compiling the message.
(R an..35)

:

c507.e2379 Date/Time/Period Format Qualifier: Allowed qualifiers:
(R an..3) "101" = YYMMDD
"201" = YYMMDDHHMM
"301" = YYMMDDHHMMZZZ ("ZZZ" = Timezone, e.g. "GMT" or other)

'

DRAFT VERSION

LOC (M99) PLACE/LOCATION IDENTIFICATION (grp1)

+

e3227 Place/Location Qualifier: Allowed qualifiers:
 (M an..3) "5" = Place of Departure
 "61" = Next port of call
 "92" = This qualifier can occur 1 to n times and is given in
 sequence of the rotation.

+

c517.e3225 Place/Location Identification: Location code of the actual
 (R AN..17) place of departure (normally the sender of the message). If possible,
 UN-Locodes of 5 characters according to UN recommendation no.16. must
 be used.

:

c517.e1131 Code list qualifier. Allowed qualifiers
 (R an..3) "139" = Port.

:

c517.e3055 Code list responsible agency, coded. Allowed codes:
 (R an..3) "112" = US, US Census Bureau, Schedule D for U S location schedule
 K for foreign port locations.
 "6" = UN/ECE - United Nations - Economic Commission for Europe.
 (UN-Locodes).

+

c519.e3223 Related place/location one identification. The ISO
 (O an..25) country code.

:

c519.e1131 Code list qualifier. Allowed qualifier:
 (O an..3) "162" = Country.

:

c519.e3055 Code list responsible agency, coded. Allowed codes:
 (O an..3) "5" = ISO

+

c553.e3233 Related place/location two identification. The
 (O an..25) state or province code, postal abbreviations.

:

c553.e1131 Code list qualifier. Allowed qualifier:
 (O an..3) "163" = Country sub-entity; state or province.

,

N.B. If locodes other than UN-locodes are used the sender must verify with the
 recipient of the message if other than UN-locodes are acceptable/ processable.
 Composites c519 and c553 are only relevant if no UN-locodes are used.

DRAFT VERSION

DTM (M99) DATE/TIME/PERIOD (grp1)

+

c507.e2005 Date/Time/Period Qualifier: Allowed qualifiers:
(M an..3) "132" = estimated date or date/time of arrival at the port-
for which handling instructions are ment.

:

c507.e2380 Date/Time/Period: Date or date/time in local time
(R an..35) when Means of Transport has arrived/departed or is expected to depart
at the senders port or is expected to arrive at the next port of call

:

c507.e2379 Date/Time/Period Format Qualifier. Allowed quali-
(R an..3) fiers:
"101" = YYMMDD
"201" = YYMMDDHHMM
"301" = YYMMDDHHMMZZZ ("ZZZ" = Timezone, e.g. "GMT" or other)

,

DRAFT VERSION

c506.e1153 Reference Qualifier: Code "VON" (Loading Voyage
(M an..3) number, if different from the voyage number in the TDT-segment,
assigned by the Operating Carrier or his agent to the voyage of the
train).

:

c506.e1154 Reference Number: The Loading voyage number.
(R an..35)

'

DRAFT VERSION

FTX (C9) FREE TEXT (grp1)

+

e4451 Text Subject Qualifier: Allowed qualifiers:
(M an..17) "HAN" = Handling Instructions
"CLR" = Container Loading Remarks
"SIN" = Special instructions
"AAI" = General information
"ZZZ" = Mutually defined use

+

+

c108.e4440 Free Text: Description/Instructions/Remarks in plain
(M an..70) language or coded, for specific cargo/equipment. Codes, etc. to be
agreed between partners. One element with maximum field length 20
characters, unless agreed otherwise.

'

N.B. 1) This segment is not generally machine processable. Use of this segment must be agreed between partners!

N.B. 2) This segment only to be used to transmit additional shipbounded information or instructions!

This segment can be used for the following:

- a. "AAI" Description of general information, plain language or codes, as agreed between partners. Maximum 20 characters.
for example : name and telephone nr SCO planner
- b. "SIN" Additional information or instructions regarding special cargoes, equipment or breakbulk shipments.
- c. "HAN" For handling instructions the following codes are recommended:
"PLC" = Stowage is subject to pileweight
"MGM" = Minimum GM-value required

DRAFT VERSION

Group **grp2** (M9999) HAN - grp3

HAN (M1) Handling instruction (grp2)

+

c524.e4079 Handling Instruction, Coded: All codes Sequence
(M an..3) within the message must be:

- "SHI" = Shift: Indicating the cells with containers/cargo to be shifted. In general within the same bay and not via the quayarea, depending on the terminal agreement.
- "RES" = Restow: Indicating the cells with containers/cargo to be restowed. In general from one bay to another and likely via the quayarea, depending on the terminal agreement.
- "LOA" = Loading: Indicating the cells to be used for loading containers/cargo due to the given specifications.
- "COD" = Change of destination: Indicating the cells with containers of which the port of discharge has to be changed.
- "EXC" = Excess of stowage positions: Indicating the excess of cell positions due to last minut drops in relation to a "MOVINS" previously sent.
- "VOI" = Cell positions to be avoided: Indicating cell positions to be avoided due to damages, repair of cell guides, etc.

,

Principles:

The (LOA), (COD), (EXC) and (VOI) handling instructions will be indicated on train wagon positions only.

Loading instruction: The main attribute will be the port of discharge, generally resulting in a number of rail wagon positions which have to be loaded with containers /cargo for that port of discharge (destination).

For Dangerous cargo, Reefers and Specials the cell positions must be strictly followed.

The (RES) and (SHI) handling instructions can be indicated in one way. On rail wagon id combined with the rail wagon position only.

DRAFT VERSION

Group **grp3** (C9999) LOC - GID - GDS - FTX - MEA - DIM - TMP - RNG - LOC - RFF
- grp4 - grp5

LOC (M1) PLACE/LOCATION IDENTIFICATION (grp3)

+

e3227 Place/Location Qualifier: Code "147" (Rail Wagon Position)
(M an..3)

+

c517.e3225 Place/Location Identification: The sequence number of the
(R an..25) railway wagon in the train. The first wagon in the train, after the
locomotive, gets sequence number '01'. The second '02', and so on.

+

c519.e3223 Related Location One Identification: The identification
(R an..25) number of the railway wagon in the train. This is the wagon number
as painted on the wagon.

+

c553.e3233 Related Location Two Identification: The actual location of
(O an..25) the container on the railway wagon. Location number to be agreed.
Recommendation: Number each 20ft slot on the wagon, starting with
'01' from the front, which is the nearest slot to the locomotive.
The second slot gets number '02', and so on. In case of double stack
trains, the lower location gets a suffix of the letter 'a' and the
upper location gets 'b'.

In case the wagon is empty this group can still be transmitted but
this data element must NOT be used. Also the EQD group, where the
container details should be given, must not be used in such cases.

,

Remarks:

The sequence of the wagons in the train and the sequence of the containers on the
wagons will always be calculated from the front of the train, i.e. where normally
the locomotive is pulling the train.

When the train arrives the first wagon is the wagon directly behind the locomotive.
If the locomotive will then be shunted to the back of the train to pull the train
from that position to a new destination the sequence of the wagons in the train
and the containers on the wagons will be reversed and consequently the first wagon
on arrival will be the last wagon on departure.

DRAFT VERSION

GID (C1) GOODS ITEM DETAILS (grp3)+
+

c213.e7224 Number of packages. The number of packages of non
(0 an..8) containerized cargo.

:

MEA (M9) MEASUREMENTS (grp3)

+

e6311 Measurement Application Qualifier: Allowed qualifiers:
 (M an..3) "WT" Grossweight
 "TAR" Tare weight

+

+

c174.e6411 Measure Unit Qualifier: Allowed qualifiers:
 (M an..3) "KGM" = kilogram = preferred
 "LBR" = pounds

:

c174.e6314 Measurement Value: The grossweight (= actual tareweight
 (D n..18) of the equipment plus its contents) in kilograms or pounds, as

qual

:

c174.e6162 Range Minimum: The minimum grossweight of range of
 (D n..18) shipments to be loaded/discharged in kilograms or pounds, as

qual

:

c174.e6152 Range Maximum: The The maximum grossweight of range of
 (D n..18) shipment to be loaded/discharged in kilograms or pounds, as qualified
 (no decimals).

,

Remarks:

In case ranges are given (date-elements c174.e6162 end c174.6152) data-element
 c174.e6314 is left out.

In case of an average weight, the values in minimum (c174.e6162) and maximum
 (c174.e6152) are the same.

DRAFT VERSION

DIM (C9) DIMENSIONS (grp3)

+

e6145 Dimension Qualifier: Allowed qualifiers are:
(M an..3) "1" = Gross dimensions (breakbulk)
"5" = Off-standard dims. (overlength front)
"6" = Off-standard dims. (overlength back)
"7" = Off-standard dims. (overwidth right)
"8" = Off-standard dims. (overwidth left)
"9" = Off-standard dims. (overheight)
"10" = External equipment dimensions (Non-ISO equipment)
Basically allowed qualifier "1" for breakbulk cargo and from "5" to "9" for odd-sized-cargo. However allowed from "5" to "9" for breakbulk cargo as additional information, if required.

+

c211.e6411 Measure Unit Qualifier: Allowed qualifiers:
(M an..3) "CMT" = Centimeters = preferred
"INH" = Inches

:

c211.e6168 Length Dimension. Breakbulk length or overlength for
(D n..15) containers, as qualified.

:

c211.e6140 Width Dimension: Breakbulk width or overwidth for
(D n..15) containers, as qualified.

:

c211.e6008 Height Dimension: Breakbulk height or overheight for
(D n..15) containers, as qualified.

,

N.B. This segment is only to be transmitted in case breakbulk, odd-sized-cargo and off-standard or non-ISO equipment is involved. In order to identify all relevant information, this segment may be repeated conditionally upto 9 times. The codes 5-9 for odd-sized cargo only, carrying just the overdimensions. In case exact dimensions are not known at time of sending the message, the composite data-elements c211.e6168, c211.e6140 and c211.e6008 to be filled with the value 0 (zero).

DRAFT VERSION

TMP (C1) TEMPERATURE (grp3)

+

e6245 Temperature qualifier: Allowed qualifiers:
 (M AN..3) "2" = Transport Temperature

+

c239.e6246 Temperature Setting: Actual temperature according to
 (R n3) Reefer List (no deviation allowed) at which the cargo is to be tran

:

c239.e6411 Measure Unit Qualifier: Allowed qualifiers:
 (R an..3) "CEL" = degrees Celsius = Preferred.
 "FAH" = degrees Fahrenheit

,

Remarks:

In case temperatures are not known at the time of sending the message, special handling of cooling/heating is indicated by mentioning the temperature qualifier only and leaving out the composite c239.

In spite of the field length of element c239.e6246 (temperature) is only N3, decimal mark and figure as well as negative values preceded by a sign (-) can be transmitted. Generally numeric data element values shall be regarded as positive unless they are preceded by a minus sign. The decimal mark and minus sign shall, however, not be counted as a character of the value when computing the maximum field length of a data element. Nevertheless, allowance has to be made for the character in transmission and reception.

Tenth of degrees have to be separated by a decimal point from full degrees (e.g. 18.5

For further explanation please refer to ISO 9735 "EDIFACT Application Level Syntax Rules", point 10 "Representation of numeric data element values".

DRAFT VERSION

RNG (C1) RANGE DETAILS (grp2)

+

e6167 Range Type Qualifier: Allowed qualifier:
(M an..3) "4" = Quantity range.

+

c280.e6411 Measure Unit Qualifier: Allowed qualifiers:
(M an..3) "CEL" = degrees Celsius
"FAH" = degrees Fahrenheit

:

c280.e6162 Range Minimum: Minimum temperature according to Reefer
(R n..18) List at which the cargo is to be transported.

:

c280.e6152 Range Maximum: Maximum temperature according to Reefer
(R n..18) List at which the cargo is to be transported.

,

Remarks:

Range minimum and maximum is only to be filled with different values in case it is allowed by the shipping line in charge of subject shipment, respectively the customer owing the goods. Otherwise c280.e6162 and c280.e6152 have to carry the same value. No deviation allowed.

DRAFT VERSION

LOC (M9) PLACE/LOCATION IDENTIFICATION (grp3)

+

e3227 Place/Location Qualifier: Allowed qualifiers:
 (M an..3) "9" = Port of Loading
 "11" = Port of discharge
 "13" = Transshipment port
 "64" = 1st optional port of discharge
 "68" = 2nd optional port of discharge
 "70" = 3rd optional port of discharge
 "80" = Original port of loading
 "83" = Place of delivery (to be used as final destination)
 "97" = Optional port of discharge.
 "152" = Next port of discharge

+

c517.e3225 Place/Location Identification: Namecode of the place/port, as
 (R an..25) qualified. Allowed codelists: UN-Locode or US-Census codes.
 Example codes: JPTYO = Tokyo
 USLAX = Los Angeles
 USOAK = Oakland
 USSEA = Seattle
 USCHI = Chicago
 For optional port of discharge (e3227 = "97"): "XXOPT".

:

c517.e1131 Code list qualifier. Allowed qualifiers:
 (O an..3) 139" = Port.

:

c517.e3055 Code list responsible agency, coded. Allowed codes:
 (O an..3) "112" = US, US Census Bureau, Schedule D for U S locations,
 Schedule K for foreign port locations.
 "6" = UN/ECE - United Nations - Economic Commission for Europe.
 (UN-Locodes).
 "ZZZ" = Optional ports.

+

c519.e3223 Related place/location one identification. The ISO
 (O an..25) country code.

:

c519.e1131 Code list qualifier. Allowed qualifier:
 (O an..3) "162" = Country.

:

c519.e3055 Code list responsible agency, coded. Allowed codes:
 (O an..3) "5" = ISO

+

c553.e3233 Related place/location two identification. The state or
 (O an..25) province code, postal abbreviations.

:

DRAFT VERSION

c553.e1131 Code list qualifier. Allowed qualifier:
(0 an..3) "163" = Country sub-entity; state or province.

,

Remarks:

1. If locodes other than UN-locodes are used the sender must verify with the recipient of the message if other than UN-locodes are acceptable/ processable. Composites c519 and c553 are only relevant if no UN-locodes are used.
2. Minimum 2 ports to be given: loading port and discharging port.
3. Use of qualifiers, other than those for port of loading and port of discharge, must be agreed between partners.

DRAFT VERSION

RFF (1) (M9) REFERENCE (grp3)

+

c506.e1153 Reference Qualifier: Allowed qualifiers:
(M an..3) "BM" = B/L-number, as dummy, in case non of the following codes are applicable.
"ET" = Excess Transportation Number to be used for leading Stowage position, in case of Breakbulk or odd-sized-cargo.
"BN" = Booking reference number.
"CN" = Carrier's reference number.
"CV" = Container operator's reference number.
"BST" = Block stow to be used in case the carrier wants to indicate that blocks of containers must be delivered via train or into barge.
"ZZZ" = Mutually agreed.

:

c506.e1154 Reference Number: For Qualifiers :
(R an..35) "BM" = always "1".
"ZZZ" = always "1".
"ET" =: Leading stowage location, containing relevant data for this consignment.
"BN" = Booking reference number assigned by carrier or agent.
"CN" = Carrier's reference number.
"CV" = Container operator's reference number.
"BST" = Mode of transport assigned by the carrier.
1 = Feeder
2 = Rail
8 = Barge

'

N.B. For breakbulk and odd-sized-cargo see chapter 3: Special User Guidelines.

Example: RFF+BM:1' or RFF+ET+0120106'

DRAFT VERSION

Group **grp4** (C9) EQD - EQA - NAD

EQD (M1) EQUIPMENT DETAILS (grp4)

+

e8053 Equipment Qualifier: Allowed qualifiers:
(M an..3) "CN" = Container

+

c237.e8260 Equipment Identification Number:
(D an..17)

1. The containernumber:

Format: One continuous string with the identification, prefix and number. Examples: SCXU 2387653 must be transmitted as "SCXU2387653", EU 876 must be transmitted as "EU876". The number will be treated as a character string. E.g. alphanumeric check-digits can be transmitted here. If this segment is used the unique equipment identification number must always be transmitted, although this element is not mandatory!

+

c224.e8155 Equipment Size and Type Identification: ISO size-type
(D an..4) code of 4 digits (ISO 6346).For unknown ISO size/type codes the following codes may be used:

"4****"	=	Length = 40ft, rest unknown
"2****"	=	Length = 20ft, rest unknown
"42***"	=	40ft 8'6", rest unknown
"22***"	=	20ft 8'6", rest unknown
"40***"	=	40ft 8'0", rest unknown
"20***"	=	20ft 8'0", rest unknown

For type indications see the next examples. (the length is always mandatory):

"2*0*" = 20ft Dry-box, rest unknown
"4*2*" = 40ft Reefer, rest unknown
etc. etc.

Other codes to be agreed between partners.

:
:
:

c224.e8154 Equipment Size and Type: To indicate the length of the
(D an..35) container in feet in relation to athwards bays and non ISO length containers (45' ; 48' ; 52').

+

+

DRAFT VERSION

e8249 Equipment status, coded.
(O an..3)

1:	Continental	11:	Direct delivery
2:	Export	12:	Bond transport
3:	Import	13:	Tranship to other vessel
4:	Remain on board	14:	Tranship to other pier
5:	Shifter	15:	Rail road transport
6:	Transhipment	16:	Road transport
7:	Hot delivery	17:	Barge transport
8:	MLB	18:	Temporary stowage
9:	MCB (Micro Land Bridge)	19:	Urgent unpacking
10:	Canada Bound transport	20:	Sea & Air

+

e8169 Full/Empty Indicator, coded. Allowed codes:
(D an..3)

"5"	=	Full
"4"	=	Empty.

,

DRAFT VERSION

EQA (C9) EQUIPMENT ATTACHED (grp4)

+

e8053 Equipment Qualifier: Allowed qualifiers:
(M an..3) "RG" = Reefer Generator
"CN" = Container
"CH" = Chassis

+

c237.e8260 Equipment Identification Number: The unitnumber.
(R an..17)

,

N.B. This segment may be used for transmission of attached equipment to container or for containers or other equipment stowed within one location with leading container in EQD (Platforms, Collapsable Flats, chassis, etc.).

DRAFT VERSION

NAD (C1) NAME AND ADDRESS (grp4)

+

e3035 Party Qualifier: Allowed code:
(M an..3) "CA" = Carrier of the cargo.
"CF" = Container operator

+

c082.e3039 Party Id Identification: Namecode of party to be billed for the
(M an..17) operation of subject equipment/cargo, if other than container operator.
This might be necessary to identify, in case operation, e.g. restow,
is caused due to a requirement from a party, which is not the contain-
er operator, e.g. another line, sharing ships space or the Terminal
operator.

:
:

c082.e1131 Code List Qualifier: Qualifier "172".
(R an..3)

:

c082.e3055 Code List Responsible Agency, coded. Allowed codes:
(R an..3) "20" = BIC (Bureau International des Containeurs)
"166" = US National Motor Freight Classification Association (SCAC)
"ZZZ" = Mutually defined.
