Other associations...

[DAD5 - SMDG #72-20181105 SMDG general presentation and Budget 2018-2021 red.pdf](#)

[DAD5 - IATA - addendum IATA framework extension - SMDG#73 20181117 SMDG general presentation and Budget 2018-2021 red.pdf](#)

11:00 - 11:30 Coffee break:

11:30 - 13:00 Subgroups splits:

Following feedback from last meetings, a lot of attendants, subgroups chairpersons and subgroups members, requested to have real sub groups meetings:

In order to do that, all subgroup subjects were proposed to be extended in different sessions:

Sessions Blue: legacy SMDG field on Edi: Baplie, Movins, Coprar, Iftsai, TPFREP, Codes. Important work must be finalised for the different Dmrs and reviews of the MIG and compliance platform and systems (GEFEG).

Critical work must be done on Codes maintenance: Location terminal codes, Operator codes, handling codes, containers codes, Iso codes

Start up work on M&R that is critical as linked also to blockchain business cases and internet of things business cases, Ror/con ro as most carriers are or will be going into more and more niche market,

Session Yellow: new IT communication fields that are about to completely change the data process by automation and decentralisation of the data owner to the container.

The blockchain session has been greatly prepared by tom from CGI, with ABN amro.

IoT, that follow up on the first business cases to be look after in blockchain and IoT which is container release that is starting the voyage trip contract of the service provided to the clients.

Each sessions chairpersons to confirm its subjects and delegates to confirm their attendance

13:00 - 14:00 Lunch at the cafeteria: under each attendees charges

14:00 - 17:30 Subgroups splits:

Session Blue: baplie- Movins- Container message 1

Message structure changes: Baplie V3 (MIG), Movins V3, (status and timeline), Baplie V2 and Movins V2 revised MIG, GEFEG validation portal.

Codes list handlings (JM4), ITIGG120V4, STOLOC 8formely Blocking), UNLOC

Proposal for a recommendation (no.7) for the use of SMDG code lists

Handling Codes: New codes, Slit up JM4 code list into multiple code lists

Update discussion on code lists referring to BAPLIE 3.

One replacement for liner codes plus 3 additions
