Terminal Codes – Sub-group workshop NLRTM – minutes and results

Agenda – Codes Lists – Terminal Facilities List

1.1 Rules and definitions for the contents of the table

Column headers:

UN/LOCODE	alternative UN/LOCODE's	Terminal Code	Terminal Facility	Company Name	...	Latitude	Longitude

Following definitions have been accepted:

UN/LOCODE	code value for the city or metropolitan region (the one with the most functions)
alternative UN/LOCODE	code value for the sub-location "port" or the location being at quite a distance from the metropolitan area
Terminal Code	It is unique when used together with the UN/LOCODE, but it is not unique on its own. The terminal code is alpha-numeric, it consists of letters and/or numbers. The terminal code has a length of 3 to 6 characters (compulsory) The terminal code should denote the facilities of a terminal, but not the individual berth at the pier
Terminal Facility	The terminal facility name shall be the official name as it appears on the website or in the signature of the terminal representatives
Company Name	The company name in the list should represent the managing
Latitude/longitude	Format: N 53° 31' 41" E 009° 55' 42" Seconds to be presented without decimals

1.2 Change policy

Change of codes

A change of codes will be allowed only in case of change of the managing company.
The old entry will be crossed out and remain like this for a while before being finally removed. A „Valid until"- date will be set.

The action can be tracked in the change log:

Last update date	UNLOCODE	Terminal Code	Reason for change	Comments
2018-12-18	SEGOT	CT	SEGOT/CT: Code "CT" finally removed	see also entry 2018-1025
2019-01-13	KRPUS	KBCT	KRPUS/KBCT: Change of Terminal and company names from "KOREA BUSAN CONTAINER TERMINAL" to "BPT BUSAN PORT TERMINAL"	Refer to information from Hapag-Lloyd (local agent Busan), e-mail on 10/01/2019: change of name "...with effective date 1st April 2018"
2019-01-13	KRPUS	BIT	KRPUS/BIT: outdated, to be removed	Refer to information received from Hapag-Lloyd (local agent Busan): no longer operated
2019-01-13	KRPUS	BPC	KRPUS/BPC: outdated, to be removed	Refer to information received from Hapag-Lloyd (local agent Busan): no longer operated
2019-01-13	CNLYG	ZGXXX	CNLYG/ZGXXX: outdated, to be removed	Refer to information received from Hapag-Lloyd (Headquarter, Michael Schröder), e-mail on 07/01/2019
2019-01-13	CNLYG	GYXXX	CNLYG/GYXXX: outdated, to be removed	Refer to information received from Hapag-Lloyd (Headquarter, Michael Schröder), e-mail on 07/01/2020
2019-01-13	INPAV	GPPL	INPAV/GPPL: outdated, to be removed	please see new entry 2019-01-13 "APMT" (APM Terminals) instead

TF codes   **Change Log**   Tabelle1   ⊕

1.3 Maintenance and quality

Goals:

Improve the quality, increase the amount of entries, cover parts where only a few entries exist: extend the list with more African terminals (see list below)

1.4 Revision – tasks

Goal: improvement of quality and reliability

- Revision:
  - Are there outdated entries?
  - Are there duplicate entries?
  - Are the terminal names and company names correct?
  - Are the geo-coordinates correct?

- Bring the coordinates into one format: remove the decimals (see lat/lon definitions above) and fill the gaps (Jasmin/Mark)

Volunteers for revision:

Julien Vengeon (CMA CGM) - Africa, Peter van Santen/André Wolf (Nile Dutch) – Africa, Mark Lim (Hamburg Sud) – Taiwan, Parts of China, Paul Waters (PSA Antwerp), Hans Rasmussen (Maersk) - Scandinavia

How to do the revision?

Check/validate	means	difficulties
correct terminal name and company name?	a) terminal/company website b) directly with the company operating the terminal c) website of the port d) local shipping line agencies in the port	• Terminal name given by the requestor not correct or missing at all • No website available • Website available in foreign language • Companies often do not reply • Websites of ports without listing the existing terminals
correct UN/LOCODE?	UN/LOCODEs by country (UNECE)	Different UN/LOCODEs might apply
Does an entry for this terminal already exist?	a) Check UN/LOCODE's list for a possible codes and look for existing entries under those UN/LOCODES b) Check SMDG terminal list under the respective UN/LOCODE's Geo-coordinates (lat/lon) Program: e.g. Google maps,Geo-Planer (https://www.geoplaner.de) based on Google maps	a) Same terminal might exist with different UN/LOCODE's and different terminal name/company name b) Geo-coordinates given by the requestor are wrong

Questionable entries

UN/LOCODE	alternative UN/LOCODE's	Terminal Code	Terminal Facility	Company Name
