TRANSSHIPMENT PROCESS

BEST PRACTICES CHALLENGE : COPRAR DISCHARGE : What we want to avoid :

SG10 : TDT+30+1929S+8+13+HLCU:172:20++A8LN2:103::FRISIA OSLO:LR'

3 interdependent axes of work in order to provide best practices :

- ✓ Recommendations
- ✓ Intercompany processes clarification
- ✓ Technical clarification in GEFEG FX (MIG)

EXAMPLE : COPRAR DISCHARGE 2.1 – Segment Group 10 (TDT) – TRANSSHIPMENT INFORMATION

If a terminal and a carrier want to start or improve EDI connections. Where do they start ?

- Recommendation #6 can guide them
- ✓ COPRAR DISCHARGE TO BE IMPLEMENTED

EXAMPLE : COPRAR DISCHARGE 2.1 – Segment Group 10 (TDT) – TRANSSHIPMENT INFORMATION

During the development of the COPRAR DISCHARGE exchange, which information do they need to include ?

- **A process can help them analyze their needs and requirements**
- ✓ **COPRAR DISCHARGE TO INCLUDE TRANSSHIPMENT INFORMATION. TERMINAL AND SHIPPING LINE CAN CHOOSE WHICH BUSINESS CASE TO AGREE ON.**

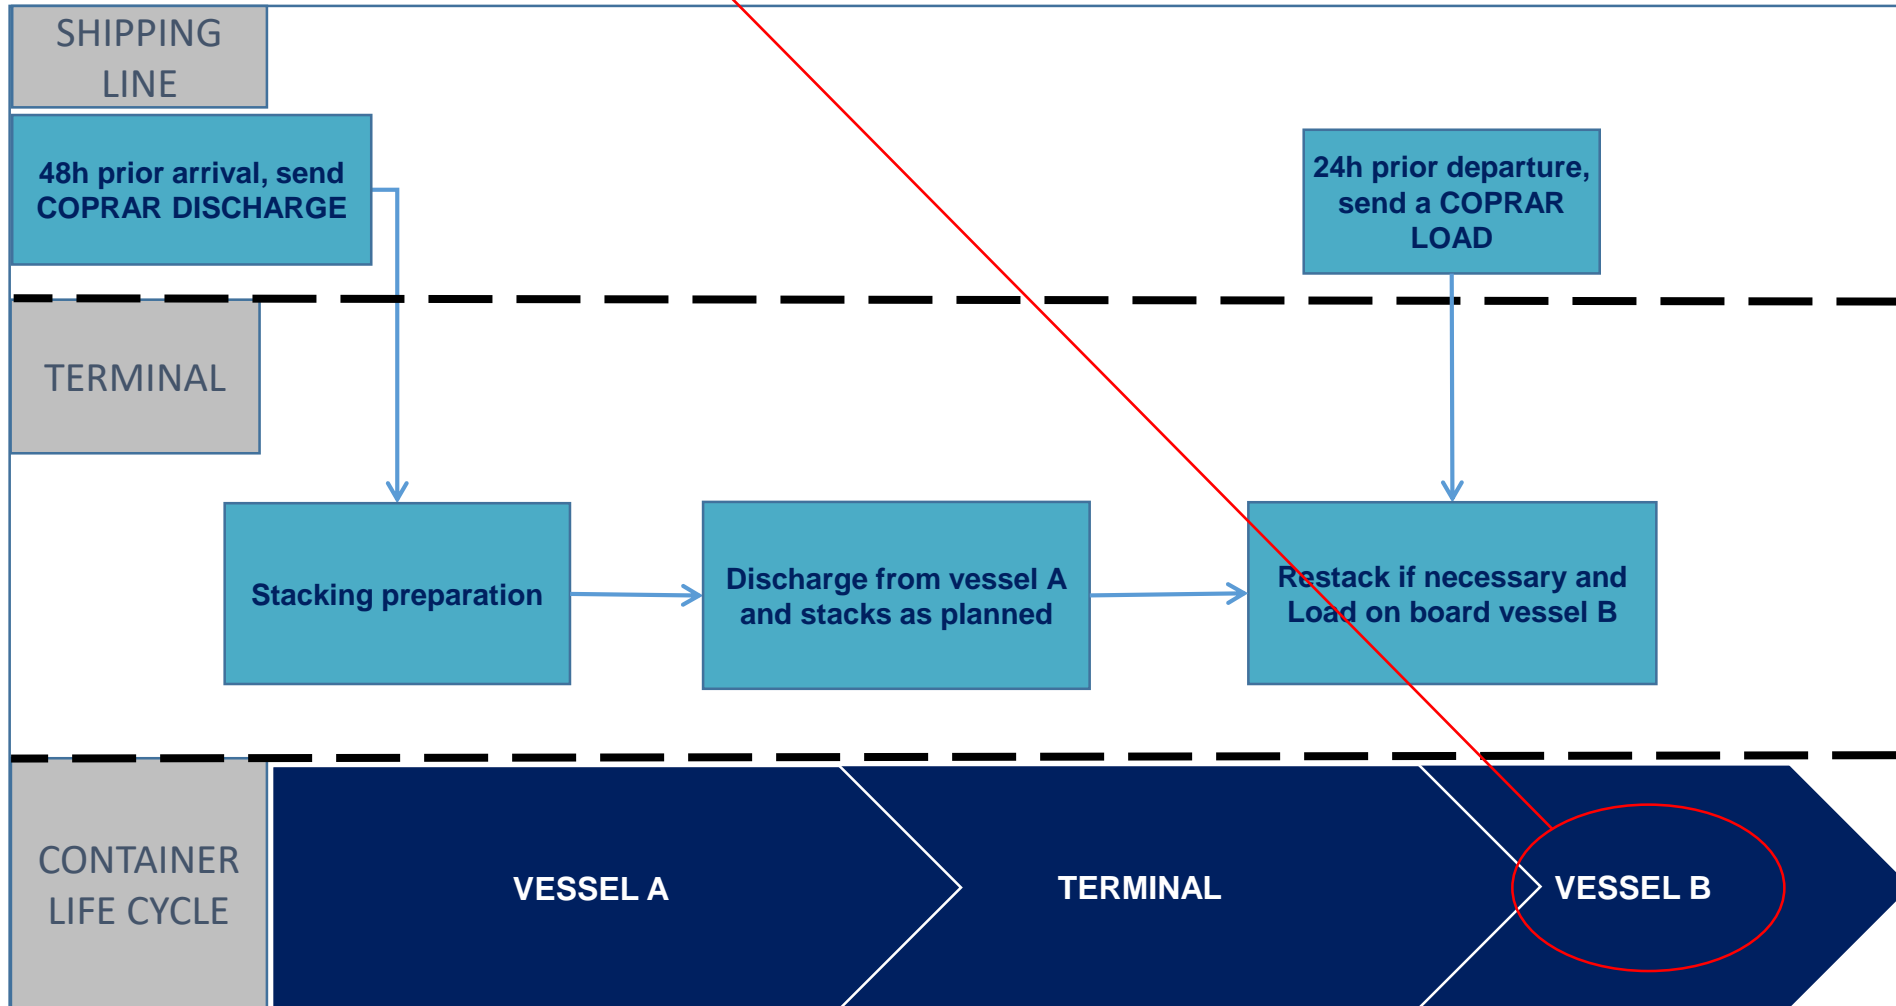

TRANSSHIPMENT PROCESS

1) TERMINAL REQUEST TRANSSHIPMENT INFORMATION FOR DIRECT TRANSSHIPMENT

SG6 – LOC : LOC+170+MYPKG'

SG10 :TDT+30+ORPANS1MA+1+++++9697026:IMO::NORDSERENA'

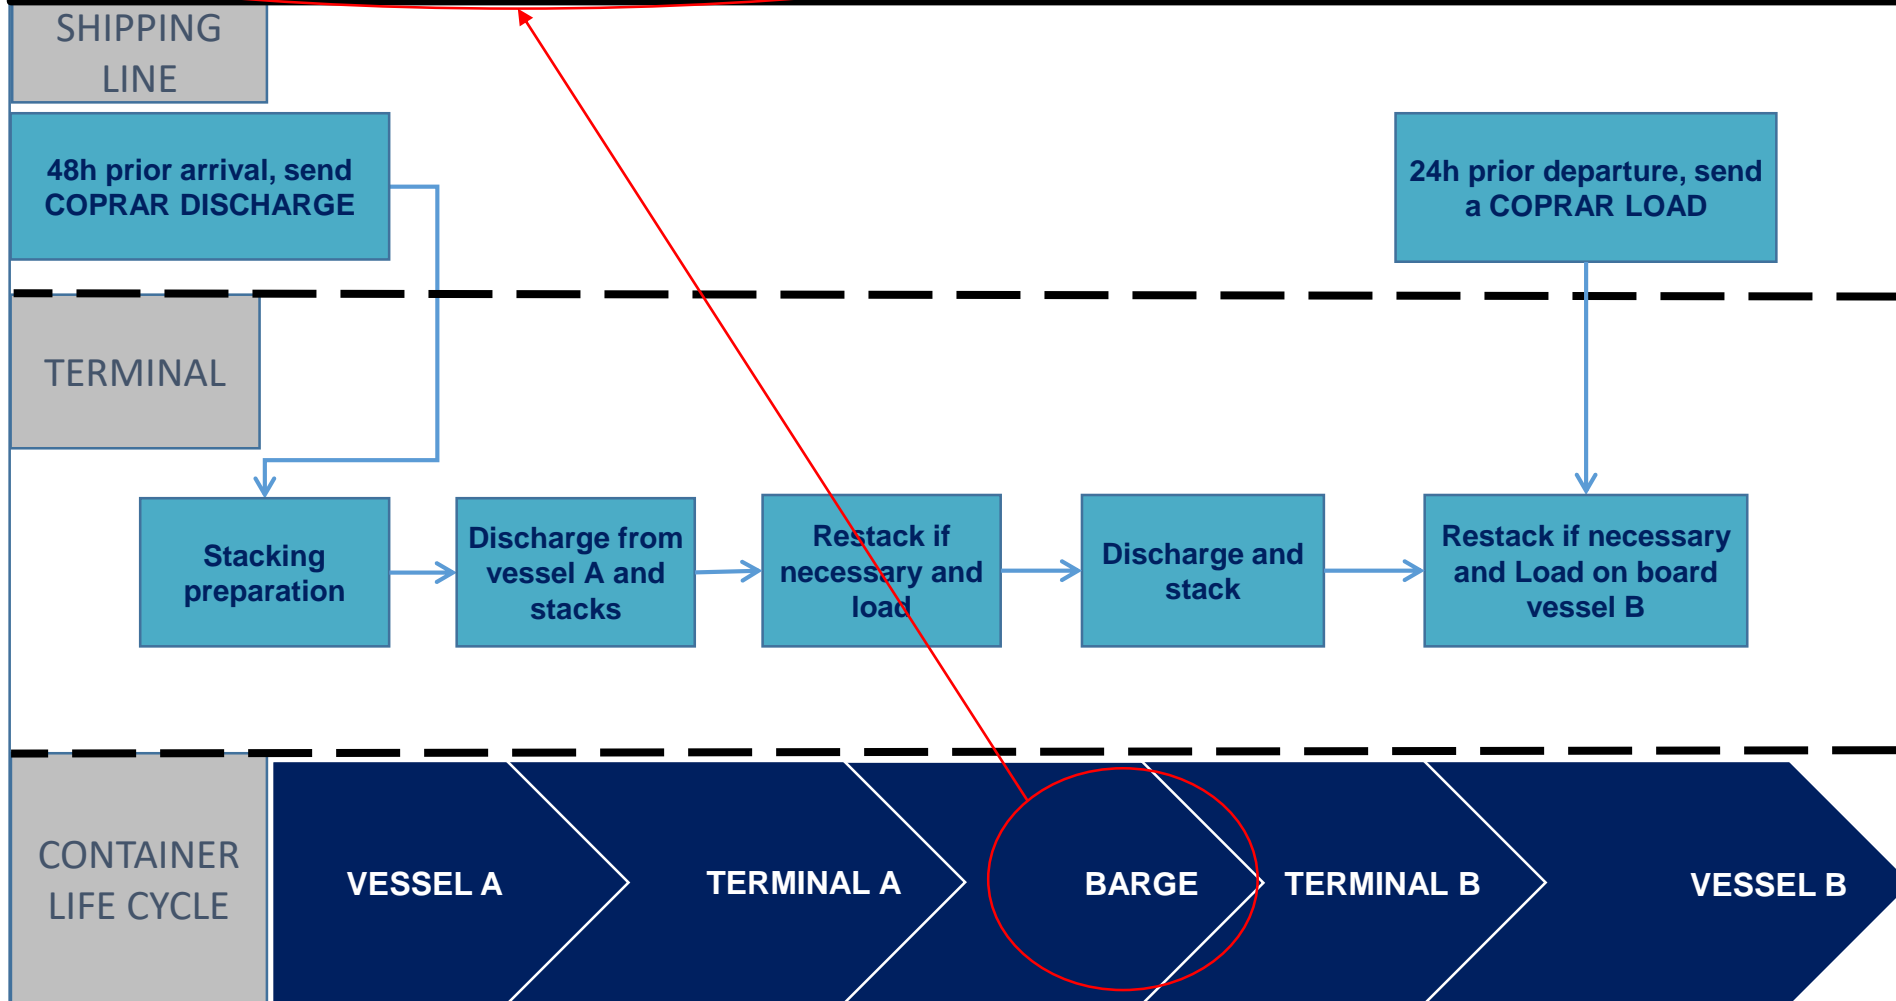

TRANSSHIPMENT PROCESS

2) TERMINAL REQUEST TRANSSHIPMENT INFORMATION FOR TRANSSHIPMENT WITH TERMINAL TRANSFER.
TERMINAL REQUESTS NEXT MODE OF TRANSPORT ONLY.

SG6 – LOC : LOC+170+MYPKG'

SG10 : TDT+30++8++++ID1848851:::GOLD'

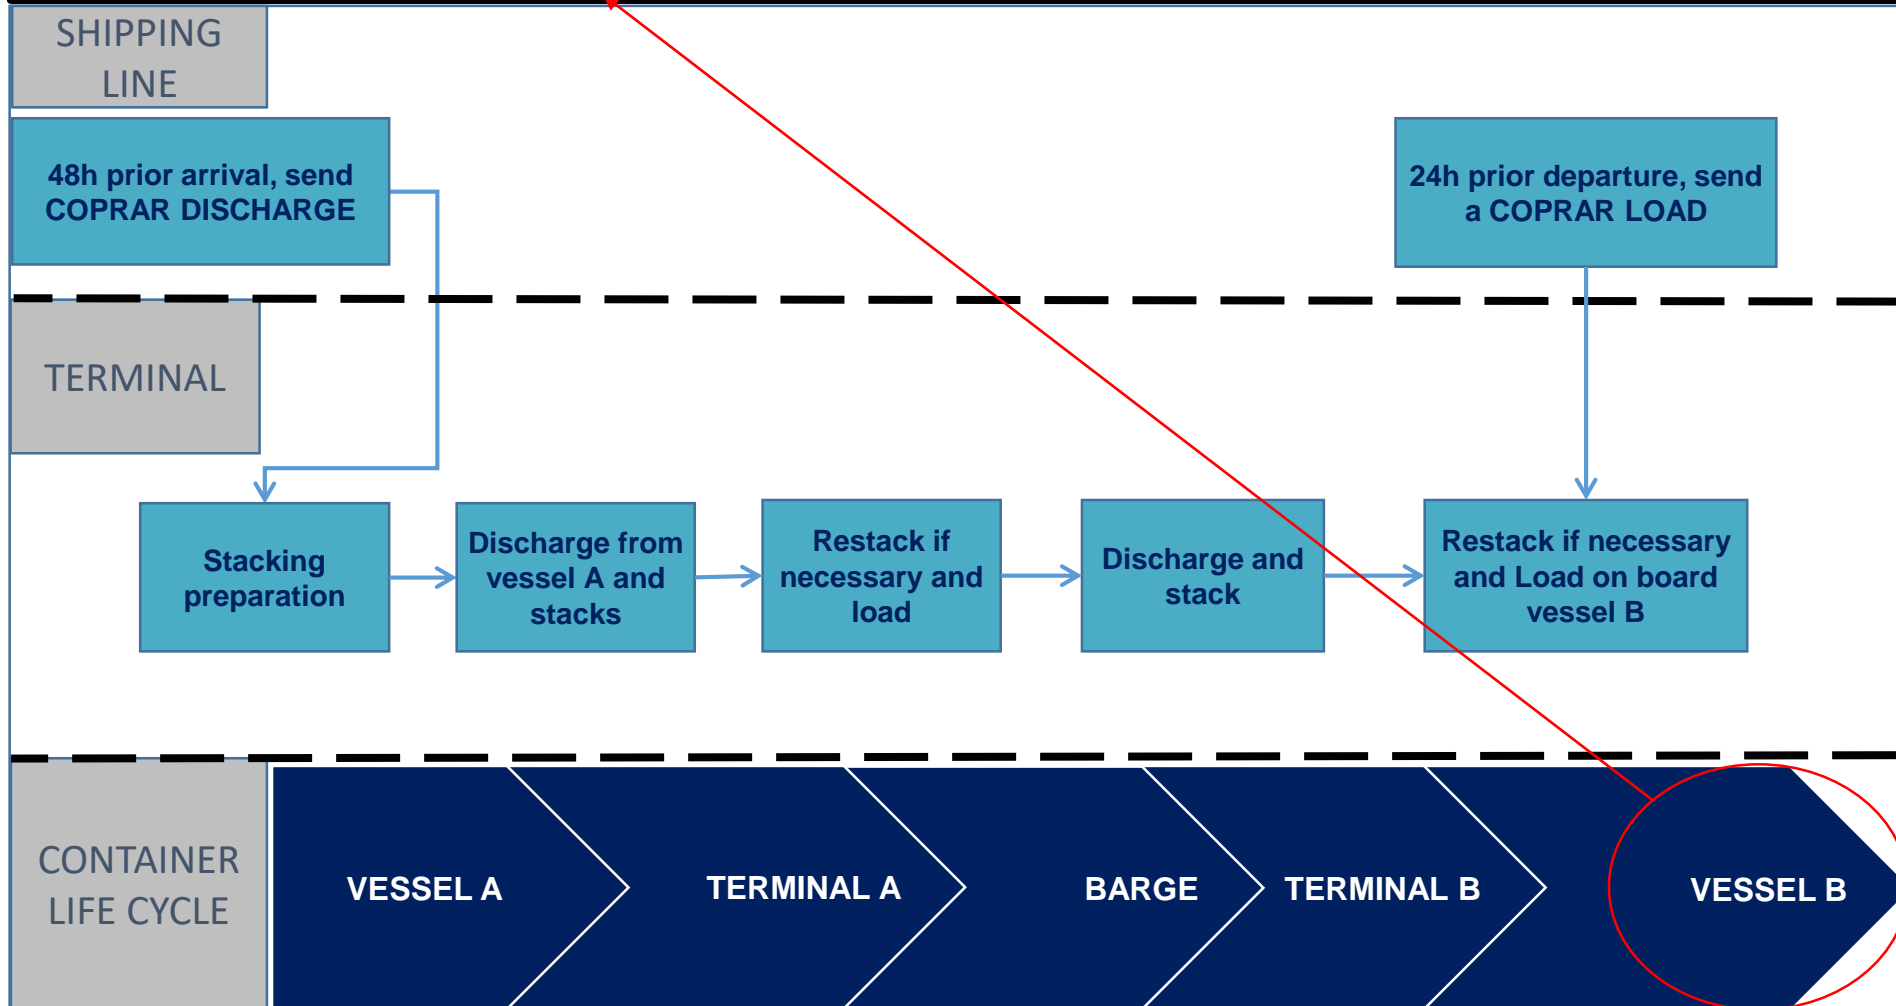

LOC+13+BEANR+1700:TERMINALS:306'

TRANSSHIPMENT PROCESS

3) TERMINAL REQUEST TRANSSHIPMENT INFORMATION FOR TRANSSHIPMENT WITH TERMINAL TRANSFER.
TERMINAL REQUESTS NEXT OCEAN VESSEL ONLY.

SG6 – LOC : ~~LOC+170+MYPKG'~~
SG10 : TDT+30+ORPANS1MA+1+++++9697026:::NORDSERENA'
~~LOC+9+BEANR+1700:TERMINALS:306'~~

EXAMPLE : COPRAR DISCHARGE 2.1 – Segment Group 10 (TDT) – TRANSSHIPMENT INFORMATION

During the development of the COPRAR DISCHARGE file, how to map the proper data at the right place ?

- A good MIG based on the process provides solutions
- ✓ **TERMINAL AND SHIPPING LINE DECIDE TOGETHER HOW THE SEGMENT GROUP 10 SHOULD BE SET UP**

S M D G

EXAMPLE : COPRAR DISCHARGE 2.1 – Segment Group 10 (TDT) – TRANSSHIPMENT INFORMATION

After the development of the COPRAR DISCHARGE file, how can they check if their file is as per SMDG recommendations?

- **GEFEG FX Is the link between our MIG and the validation portal**
- ✓ **TERMINAL AND / OR SHIPPING LINE TEST THE FILE IN THE VALIDATION PORTAL**

WHAT DO WE NEED TO DO TO ACHIEVE THE GOAL

All starts with Pain Points / Opportunities

- We need a mailbox to collect the pain points
 - Clean up all MIG
 - Create all recommendations per partnership
 - Create processes per pain point – which tool?
 - Update the MIG to cover the best practice

Thank you all so very much!
