

Session/Date	Description	Category (Information, Decision)	Presenter
10. 05. 2022	<p>Recommendation #8 (empty tanks with residues) During presentation there was heavy protest by Ori Ben-Shimon (ZIM) for publishing such a recommendation. It would not be necessary to process such attributes. Equipment with Dangerous Good should always be marked "full". Most other attendees did not agree. Empty tanks with residues cause special attention in processing. Authorities may containers marked as "full", with other documents describing the content of containers. - As compromise it was agreed to postpone publishing until decision by the board.</p>	Information	Jost Müller
10. 05. 2022	<p>Recommendation #7 – always use latest code list Due to changes in the sequence of sessions, the presentation was held as brief information before the presentation of container messages.</p>	Information	Jost Müller
